

Feedback of existing website "www.Sauditga.org"

1. Technology Stack used: WordPress CMS

- a. Wordpress plugins used
- b. Woo commerce plugin used
- c. Ultimate Membership Pro plugin used for memberships

Our Suggestion: With the new technology stack (Laravel) which we suggest we can fulfill the complete requirements you mentioned in given document.

2. Domain Registration and Hosting

- a. Registrar: Namecheap.com
- b. Hosting servers: <https://www.unifiedlayers.com/>
- c. Hosted on: ns1.thereporters.tv

Our Suggestion: Using a VPS Cloud will improve performance, Please Avoid shared hosting services.

3. CDN used: No

Our Suggestion: Using CDN improve sites speed and performance

4. Language: Arabic

Changes Required

Technology Stack Changes: For existing using a Wordpress CMS and more 3rd party plugins it slows down the website and not possible to customize as per your current requirements. So we here suggest you the below Technology stack,

- a. Replace existing Wordpress website with Laravel (a PHP Framework)

#20-4-151/A2, Govinda Nagar, Karkambadi Road, Tirupati.- 517501, Mobile :9885503336.

www.brainbit.in

SEO Performance and Optimization:

a. Current website's Page Speed Insights

Desktop Loading Time: 9 Seconds (Fair Loading Time)

Mobile Loading Time: 15 Seconds (Poor Loading Time)

Performance Scores for Mobile: 5 (100 is the highest)

Performance Scores for Desktop: 21 (100 is the highest)

b. On-page SEO Score is 0 (Very Low)

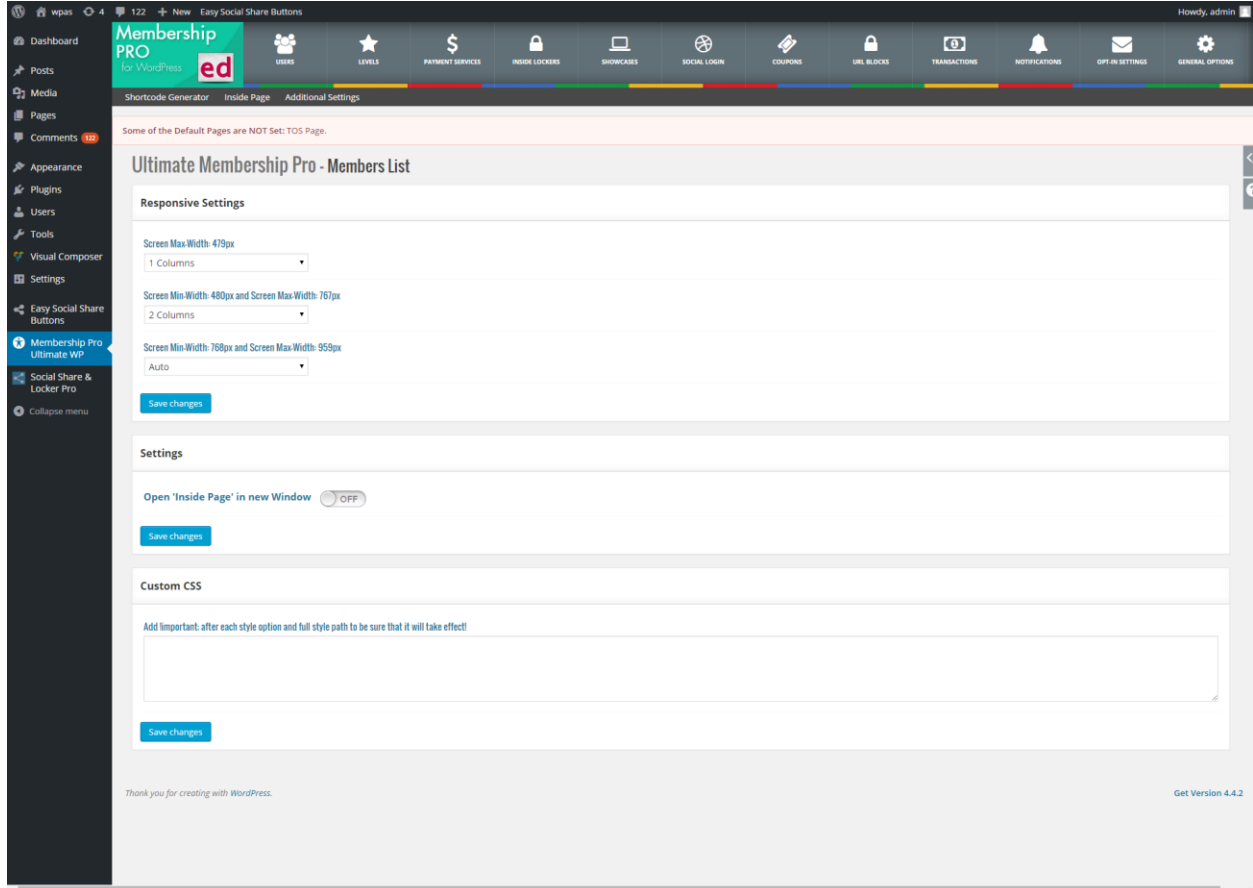

Note: There are some critical issues which is the reason for low performance scores in mobile and desktop.
